

IMMUNE AND DIGESTIVE SUPPORT

The more we learn about our intricate digestive system, the more we discover how closely tied it is to our overall health. An astounding 70 percent of your immune system is located in your digestive tract; it's no surprise that research demonstrates that probiotics may boost our immunity. Clearly, probiotics help keep us healthy by more than just aiding digestion. Safely boosting the immune system helps our immune system do its job better. When supported at a clinically proven effective level with beta glucan, the immune system can better manage challenges that can compromise its effectiveness. And, a strong immune system is integral to our overall health and well-being. BC Nutrition is proud to introduce Next Coffee for Immune and Digestive Support, a functional coffee product developed to help our body maintain healthier digestion and immune function. Next Coffee for Immune and Digestive support contains two key ingredients, probiotic *Bacillus coagulans*, and beta glucan. Our innovative process enables us to incorporate these key ingredients into the roasted coffee. Efficacious levels of the nutrients can be incorporated without the use of artificial ingredients or processing aids and without affecting the stability of the ingredients.

- Fortified with Probiotic *Bacillus coagulans* and beta glucan derived from yeast
- Probiotic survives 10x more effectively in gastric environment compared to yogurt cultures
- Supports immune function
- Supports digestive functions
- Supports protein utilization
- Non GMO
- Allergen Free

Ingredients: Roasted ground coffee beans, Beta Glucan, *Bacillus coagulans*

Suggested Use: Same as regular coffee
